1. The use of the trademark Betadine has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

2. Claim 2, 3, and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

"Paper-like" in claims 2 and 3 is indefinite because it is not clear from the specification what qualities of paper the sheet must have to be paper-like. The trademark Betadine is improper in claim 6 as it indicates a source of goods and not a specific material.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1772

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over McAtee et al. (U.S. 6,280,757).

The reference teaches two outer layers which maybe made of paper fibers and an internal patterned adhesive layer with a cleaning substance in the pattern of the adhesive (Figures 4 and 5 and the abstract). A biocide may be an optional ingredient (col. 30, lines 10-30). The instant invention claims a three layer structure with an antibacterial agent. It would have been obvious to one of ordinary skill in the art to add a bacterial agent from the options given in the reference in order to enhance they hygiene of the tissue.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 703-308-2420. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 703-308-4251. The fax phone numbers for the
